OUR STORY

When Wearing the Best, Don't Expect Less!

At Asham Curling Supplies, our journey is one of passion, dedication, and a relentless pursuit of excellence. Founded in 1977 by Arnold Asham, a true visionary and ardent curling enthusiast, our brand has become synonymous with quality, innovation, and unwavering commitment to our customers.

Embracing Excellence

From the outset, we set out to revolutionize the curling industry by crafting the finest curling shoes available. However, our quest for perfection didn't stop there. Driven by a relentless pursuit of quality and innovation, we established a rigorous quality assurance program, ensuring that every product bearing the Asham name meets the highest international standards.

A Legacy of Innovation

Over the past four decades, Asham has been at the forefront of innovation in curling equipment. Our groundbreaking patented RDS™ (Rotator Disk System) allows for customizable sliding platforms, empowering curlers to optimize their performance with ease. From carbon brushes to apparel, our diverse range of products has been meticulously designed to help you "Curl Your Best."

Honoring Tradition, Embracing the Future

As a family-run Canadian business, we take pride in our heritage and values. Rooted in integrity and sincerity, we strive to serve our customers with the same level of care and dedication that has defined our brand for generations. With over 45 years of experience, Asham continues to evolve, adapt, and innovate, always staying ahead of the curve.

More Than a Brand

But Asham is more than just a brand — we are a part of the rich tapestry of curling history. From the frozen lochs of Scotland to the Olympic podiums of today, curling has captivated hearts and minds for centuries. Our founder, Arnold Asham, not only shaped our brand but also made significant contributions to the sport, founding the World Curling Player's Association, and co-founding the World Curling Tour.

Join Our Journey

As we look to the future, our commitment remains unwavering. With a 100% satisfaction guarantee and an unparalleled warranty policy, we stand by our products and our customers. Wherever your curling journey takes you, Asham is here to support you every step of the way.

Join us as we continue to push the boundaries of excellence in curling, Curl Your Best with Asham!

CURL YOUR BEST

Asham's Rotator Disk System (RDS™)

Asham's patented RDS™ reflects our commitment to innovation. Engineered to overcome the unique challenges of curling, it provides practical solutions to common issues like drifting, slider performance, and balance.

What sets RDS™ apart is its meticulous development process, spanning over a decade of research and development, coupled with extensive testing by professional curlers worldwide. We've listened to feedback and continuously refined our design to ensure peak performance on the ice.

In our pursuit of excellence, we've also significantly reduced the weight of the sole, making it the lightest option available on the market today.

The RDS™ offers remarkable versatility thanks to its Velcro® attachment system. Curlers can easily upgrade, replace, or personalize their sliding platform without any fuss. Gone are the days of sending shoes away for repairs or upgrades. Now, simply order new disks, attach them to the shoe, and hit the ice again in no time. For any issue with drifting during delivery, just give it a quick rotation until you find the ideal sliding path to prolong the life of your slider.

The reliability of our RDS™ has been proven time and again, with all four of the Canadian National Champions in the same year – men's, women's, junior men's, and junior women's – choosing to trust our sole. Furthermore, both junior teams went on to secure the title of World Junior Curling Champions, a testament to the performance and quality of our product.

We understand the demands of the sport, and our RDS™ stands unmatched as the top sliding platform available.

Eliminates Drifting & Increases the Life of Your Sliders

The sole of the shoe is longer than it is wide so the natural tendency when sliding is to go in the direction it is pointed. The circular RDS™ have equal force on all sides creating a straighter slide.

The grain in some sliding materials, as well as worn, warped and scratched sliders cause drifting. The RDS™ allows you to rotate your disk to find the straightest sliding path thus prolonging the life of your slider and eliminating drifting.

Enhances Balance & Stability

Most athletic shoes are designed to run on the balls of your feet. Asham has invested in soles specifically designed for curling, built up on the sides, with the disks extending beyond the width of a normal sole, to create a flat sliding surface, providing unmatched stability and performance.

Maximum Slider Performance

With the RDS™ you can customize your sliding platform with a wide range of sliding materials right in the store for both right and left-handed curlers. No need to wait on custom ordered shoes. Simply choose your disks for both the front and back and you're ready to hit the ice.

Ultimate advantage: Grow into your shoes! When you're ready to upgrade, easily upgrade your sliding disks, quickly replace worn or damaged sliders and grippers. A task that can't be done with traditional platforms.

Hard Chromed Stainless Steel

Asham has almost 50 years of experience in the curling industry and recommend stainless steel. Some feel that stainless steel is too fast. In reality, you can come out slower and maintain your speed adding valuable set up time. Stainless steel is easier on your knee as it requires less leg drive and has a smoother slide. It is the longest lasting slider as it can be polished to remove small scratches and bring it back to life. Try our Hard Chromed Stainless Steel!

Note: Blue, Red and Grey are available while supplies last.

SHOE CARE TIPS

Avoid moving rocks with the side of your shoe, as the striking band is sharp and can lead to premature wear. When setting up in the hack, place the ball of your foot in the hack rather than your toe, as the rubber can damage the toe of your shoe. Follow these expert tips to maximize the benefits of your warranty.

CURLING SHOE CUSTOMIZATION

CUSTOMIZE YOUR CURLING EXPERIENCE WITH ASHAM!

We take pride in offering the ultimate customization options for your curling shoes. As pioneers in the industry, our commitment to quality craftsmanship and innovation sets us apart. Let's explore how you can tailor your curling shoes to bring your game to new heights.

Tailored to Perfection

Did you know that at Asham, customization isn't just an option, it's our specialty? With our state-of-the-art factory located in Winnipeg, we have full control over every aspect of production, ensuring top-notch quality and limitless possibilities. We have the expertise to create the perfect shoe for you. We can customize any type of shoe, with any type of slider. Make your dream shoe a reality with Asham. From Hard Chromed Stainless Steel, ¼" Teflon®, Full Velcro® to convert your runner to the RDS™...if you can imagine it, we can achieve it. Full and half slider applications are available in any of our sliding materials.

Here are just a few of the customizations we offer

TOE DIP

The Toe Dip is a plastic coating applied to the trailing foot to reduce drag. Depending on how your trailing foot contacts the ice you may find the toe dip improves the feel and speed of your delivery. Our toe dip material is flexible and will not make the trailing foot hard, which can contribute to drifting. Stiff toe dip is available by request. Toe dip cannot be removed once dipped.

HINGE

The Hinge is a split in the slider at about the halfway point of the slider to allow for bend. The hinge is good for tuck or toe sliders using Teflon®.

TOE WEDGE

The Toe Wedge is a piece of Teflon® that is applied to the toe of the RDS™ for extreme toe or tuck sliders. Not all toe or tuck sliders will require the Toe Wedge.

Tip: When you're trying your new shoes, it's important to make sure both shoes fit comfortably and are performing for you. One way to do this is by trying your new front foot with your old back foot and vice versa. This allows you to ensure your new shoes are the right match for your optimal performance.
